PROFESSIONAL SUMMARY

Forward-thinking Computer Science undergraduate specializing in Generative AI, RAG systems, and Full-Stack automation. Proven track record of architecting scalable workflows and AI-driven applications that reduce operational overhead by up to 70%. Passionate about solving complex enterprise challenges through LLM integration. Seeking Summer 2026 Infosys InStep Internship.

EDUCATION

B.E. in Computer Science & Engineering

Vidya Vardhaka College of Engineering (VVCE), Karnataka

Expected Graduation: 2027 | CGPA: 7.7/10

TECHNICAL SKILLS

- Languages: Python, JavaScript (ES6+), SQL, HTML5, CSS3
- AI & ML: Generative AI, RAG Pipelines, LangChain, Prompt Engineering, Embeddings
- Frameworks: FastAPI, React.js, Node.js, Express.js, Streamlit, scikit-learn
- Tools & Cloud: n8n (Workflow Automation), Docker, Git/GitHub, Google Cloud (Basics)

PROJECTS

RAG-Based Intelligent Document Assistant | Python, LangChain, ChromaDB

- Engineered a local LLM-based RAG system to summarize complex PDF documents, reducing hallucination rates by ~30%.
- Implemented a dual-mode architecture supporting both offline CLI interaction and online API access.

Automated Career Outreach Workflow | n8n, Python

- Designed a fully automated workflow using n8n to generate tailored resumes and manage cold-email outreach campaigns, cutting manual effort by 70%.
- Integrated logic to personalize email content based on job descriptions, significantly improving outreach consistency.

EduTech AI: Smart Lecture Transcription Platform | React, FastAPI

- Developed a platform capable of ingesting audio/PPT inputs to transcribe 1-hour lectures with 95% accuracy.
- Built a summarization engine that converts transcripts into concise, exam-focused study notes.

EXPERIENCE

Freelance Automation & Full Stack Developer | Remote

[Month, Year] - Present

- Architected and deployed automation workflows using Python/n8n, reducing manual effort by 40%.
- Developed performant RESTful APIs using FastAPI to integrate Generative AI capabilities.
- Delivered full-stack web prototypes tailored to real-world use cases.

ACHIEVEMENTS

- Hackathon Leadership: Led teams in 6 major hackathons; secured top-3 finishes.
